Course Content Disclosure

The Crisis Prevention Institute (CPI)/Dementia Care Specialist's (DCS) Dementia Capable Care training utilizes theoretical frameworks that focus on person-centered care, best ability to function, and the understanding that behavior is communication. These frameworks promote quality of life and meaningful engagement for persons at all dementia stages. In addition, this program applies strategies to prevent or safely deescalate distress behavior at the earliest stages possible while promoting an environment of Care, Welfare, Safety, and SecuritySM. We ask our Dementia Capable Care Certified Instructors to apply what is learned and to train others to help create a dementia capable workforce and a Dementia Capable Society.
